## "Setting New Standards In The Security Industry"

Professional Security was established in 2003 in the north of England and has grown rapidly, taking on national contracts across a range of sectors.

We cover the full spectrum of security services utilising the most effective and up to date processes and techniques, tailoring services to provide efficient and cost effective security solutions for our clients.

We now operate across the UK and have a rapidly increasing staff base in excess of 2500 trained, accredited and licensed security personnel.

We uphold the highest industry standards and continually strive to improve service levels and focus on customer service and responsiveness.

Professional Security currently holds SIA Approved Contractor Scheme (ACS) status for the provision of **Door Supervision and Manned Guarding**. The ACS Standard encompasses all aspects of a security provider's operation. It takes a holistic view of how well an organisation is managed and an approved organisation must demonstrate to an independent assessor, on an annual basis, that it has met defined standards.

We have a zero tolerance approach to poor performance and unprofessional practices, systemic in the security industry.

We recognise the importance of and are committed to ongoing training and development for all of our staff and provide this through our in-house training facility.

"We have always been impressed by their appearance, time keeping, professionalism and brand awareness. We will not hesitate recommending their services to any other retail company, confident they will match their needs and expectations." *Jennifer Smith, Reiss - Retail Operations Manager*
